SUMMARY

Passionate **Full Stack Developer Intern** currently working at **KratiTech AI**, with a strong track record of designing and building end-to-end web solutions that drive innovation and efficiency. Adept in both front-end and back-end development, with expertise in crafting seamless, user-centric applications. Skilled at translating complex business requirements into scalable, high-performance systems that enhance user experience and operational productivity.

KEY SKILLS

• Full Stack Web Development • MERN Stack (MongoDB, Express.js, React.js, Node.js) • RESTful API Integration • Front-End Interface Design • Responsive Web Design • State Management (Redux / Context API) • Backend Development & Server Logic • Authentication & Authorization • NoSQL Data Modeling • Database Design & Management • API Development & Documentation • Asynchronous Programming • Code Debugging & Troubleshooting • Version Control (Git/GitHub) • Test-Driven Development

TECHNICAL SKILLS

Programming Languages: JavaScript, Java
Web Development: HTML5, CSS, Responsive Design, Tailwind CSS
Back-End Technologies: Node.js, Express, RESTful APIs
Database: MongoDB
FrontendTechnologies: React
Software Testing: Selenium

KEY DEVELOPMENT PROJECTS

Somani Finance: Link
- Somani Finance is a web application built using React and Express.
- It provides users with real-time updates on daily stock prices and mutual funds.
- The platform features a clean, responsive UI for smooth navigation and insights.
- It is designed to simplify investment tracking for better financial decisions.

TMDB Movie App: Link
- Created a React SPA using TMDB API, Axios, and React Router.
- Developed reusable components, dynamic routing, and a responsive UI with Flexbox & Grid.
- Displayed live movie data with categories like Trending, Top Rated, and Upcoming.

Spark E-Commerce Website: Link
- Developed a modern, interactive e-commerce UI using React to showcase electronic products.
- Built reusable components such as product cards, banners, and cart elements using functional programming patterns.
- Implemented cart functionality with useState and useContext for global state management across components.
- Designed a dynamic product catalog with filtering, sorting, and rendering of mock JSON data for enhanced UX responsiveness

Satara Tourism Website: Link
- Designed and developed a responsive tourism website for Satara using vanilla JavaScript, HTML5, and CSS3.
- Implemented dynamic filtering and categorization of tourist spots using DOM manipulation for smooth interactivity.
- Ensured cross-device compatibility through responsive design techniques and media queries.
- Added real-time location card rendering and toggleable filters for an engaging user experience.

EDUCATION

Bachelor of Technology

Dr. Babasaheb Ambedkar Technological University

CERTIFICATIONS

- **Software Development Bootcamp** | upGrad
- **Software Testing with Java** | Pentagon Space
